For Hair Extensionists

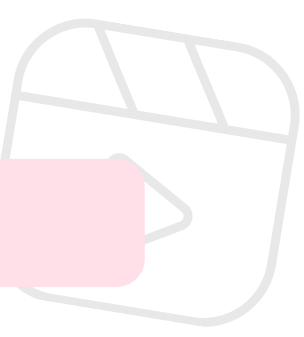

October brings a new set of challenges for hair extension clients.

As scarves, coats, knitwear and central heating become part of everyday life, simple seasonal habits can make the difference between hair that stays beautiful and hair that becomes tangled, dry or difficult to manage.

This month's content focuses on helping clients protect their investment through practical advice, relatable education and seasonal inspiration.

Use these ideas to position yourself as the trusted expert who doesn't just fit hair extensions—you help clients enjoy them throughout every season.

As always, make the content your own. Use your own clients, your own experiences and your own personality to create posts that feel authentic, build trust and encourage lasting client relationships.

REELS

October Reels should make clients stop and think:
